_____

MEDION JUKEBOX MDJUKE2xx : FW Update 1.4.2

After downloading the files, unzip them to your PC. Several files will be created; the main control-tool for the update is „Recovery-CD.exe".
Connect your Jukebox to an external power supply, establish a connection to your PC using the USB cable and switch the Jukebox into USB-mode.
IMPORTANT NOTE: Backup your data and music files from your Jukebox before updating the FW!

Start "Recovery-CD" on your PC:

Click to "Install" to start the update process.
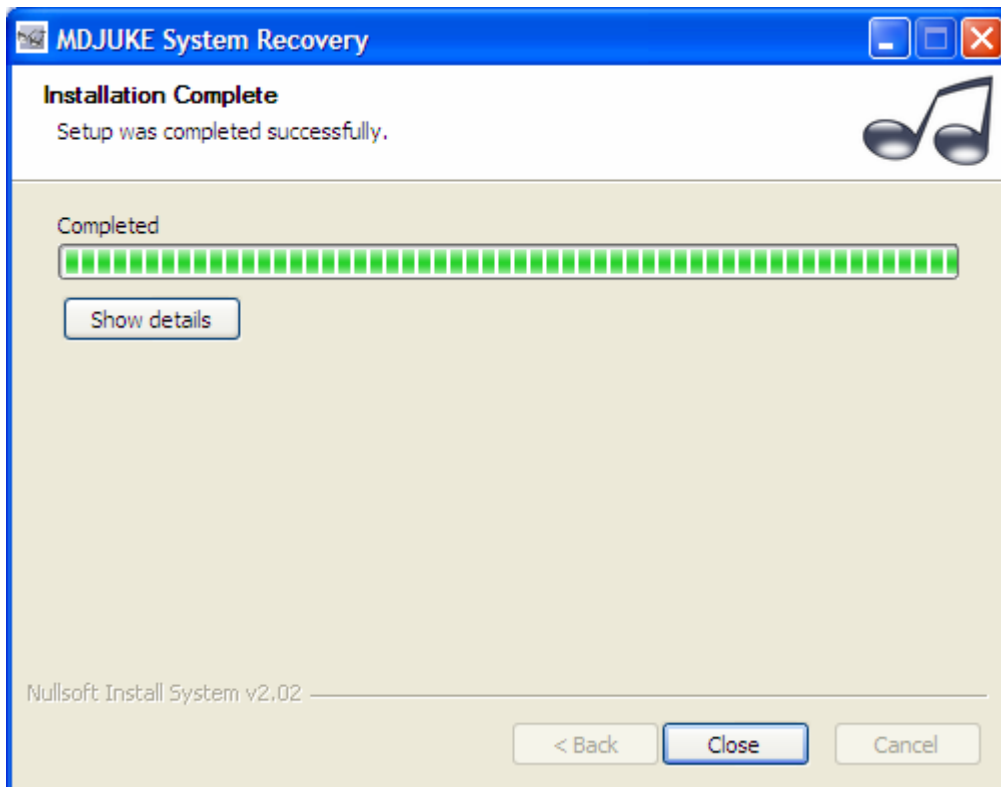

The success of the consistency check will show up as:

Click to „OK" to replace the FW on your Jukebox with the new one.

_____

_____

After a successful update your PC shows:

Click to „OK" to terminate the update process.

Next click on „Close" to terminate the update-tool.

Unplug the Jukebox from your PC and restart the Jukebox.

After this restart first select the language of the user interface. Use the MENU-key to return to the main menu.
