# P722 Firmware Installation Instruction

Notice:

During the installation process, make sure you have the P722 device connected to a power outlet. If not, your player will not be able to work properly after the firmware setup. The screen will show:

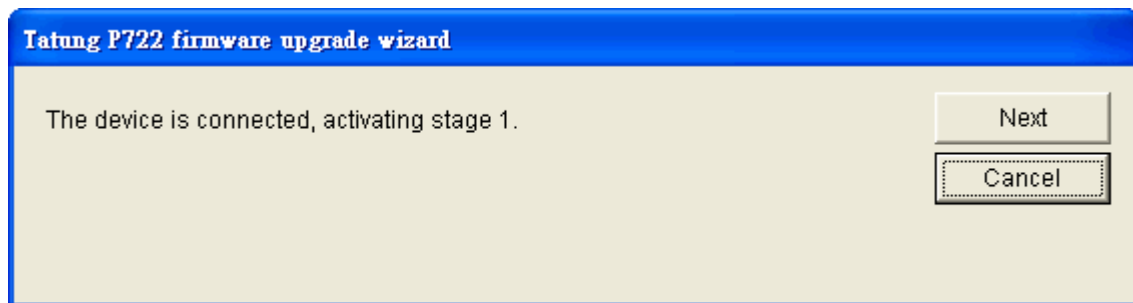

Step 1: Double click on the Firmware_Setup_2005_Dec_28(Europe).exe file. Click the Install button to proceed.

Step 2: Connect the P722 device to the computer via USB and then turn on the device.

```
Tatung P722 firmware upgrade wizard

Please connect the device.                              [ Start ]

                                                        [ Cancel ]
```

Step 3: Once the device is connected, click the Next button to proceed.

```
Tatung P722 firmware upgrade wizard

The device is connected, activating stage 1.           [ Next ]

                                                        [ Cancel ]
```
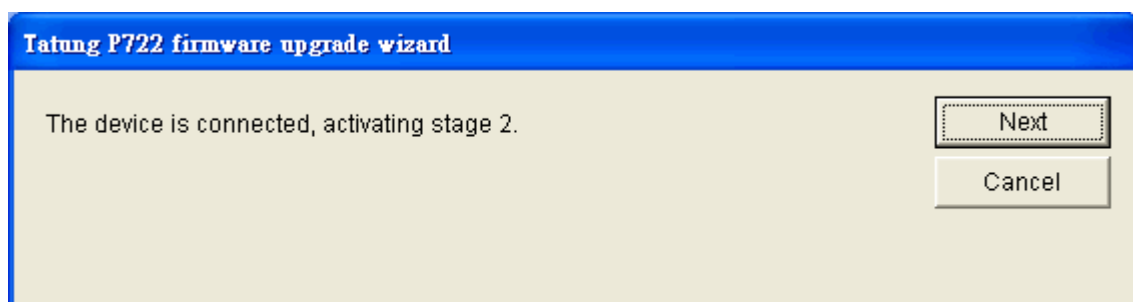

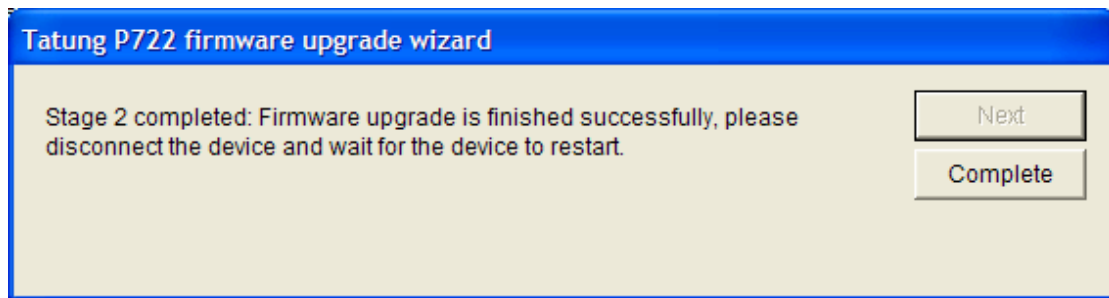

Step 4:
- Wait for the program to install the firmware; it may take a few seconds.
- When you are prompted to "Safely To Remove Hardware", disconnect the device from the computer and wait for it to restart.
  (Note: Do not turn off or reset the device)
- At this point, please note that THE FIRMWARE UPDATE IS NOT COMPLETED YET, you need to reconnect the device back to the computer.

```
